The Silent Epidemic: Understanding the Scale of Diabetes

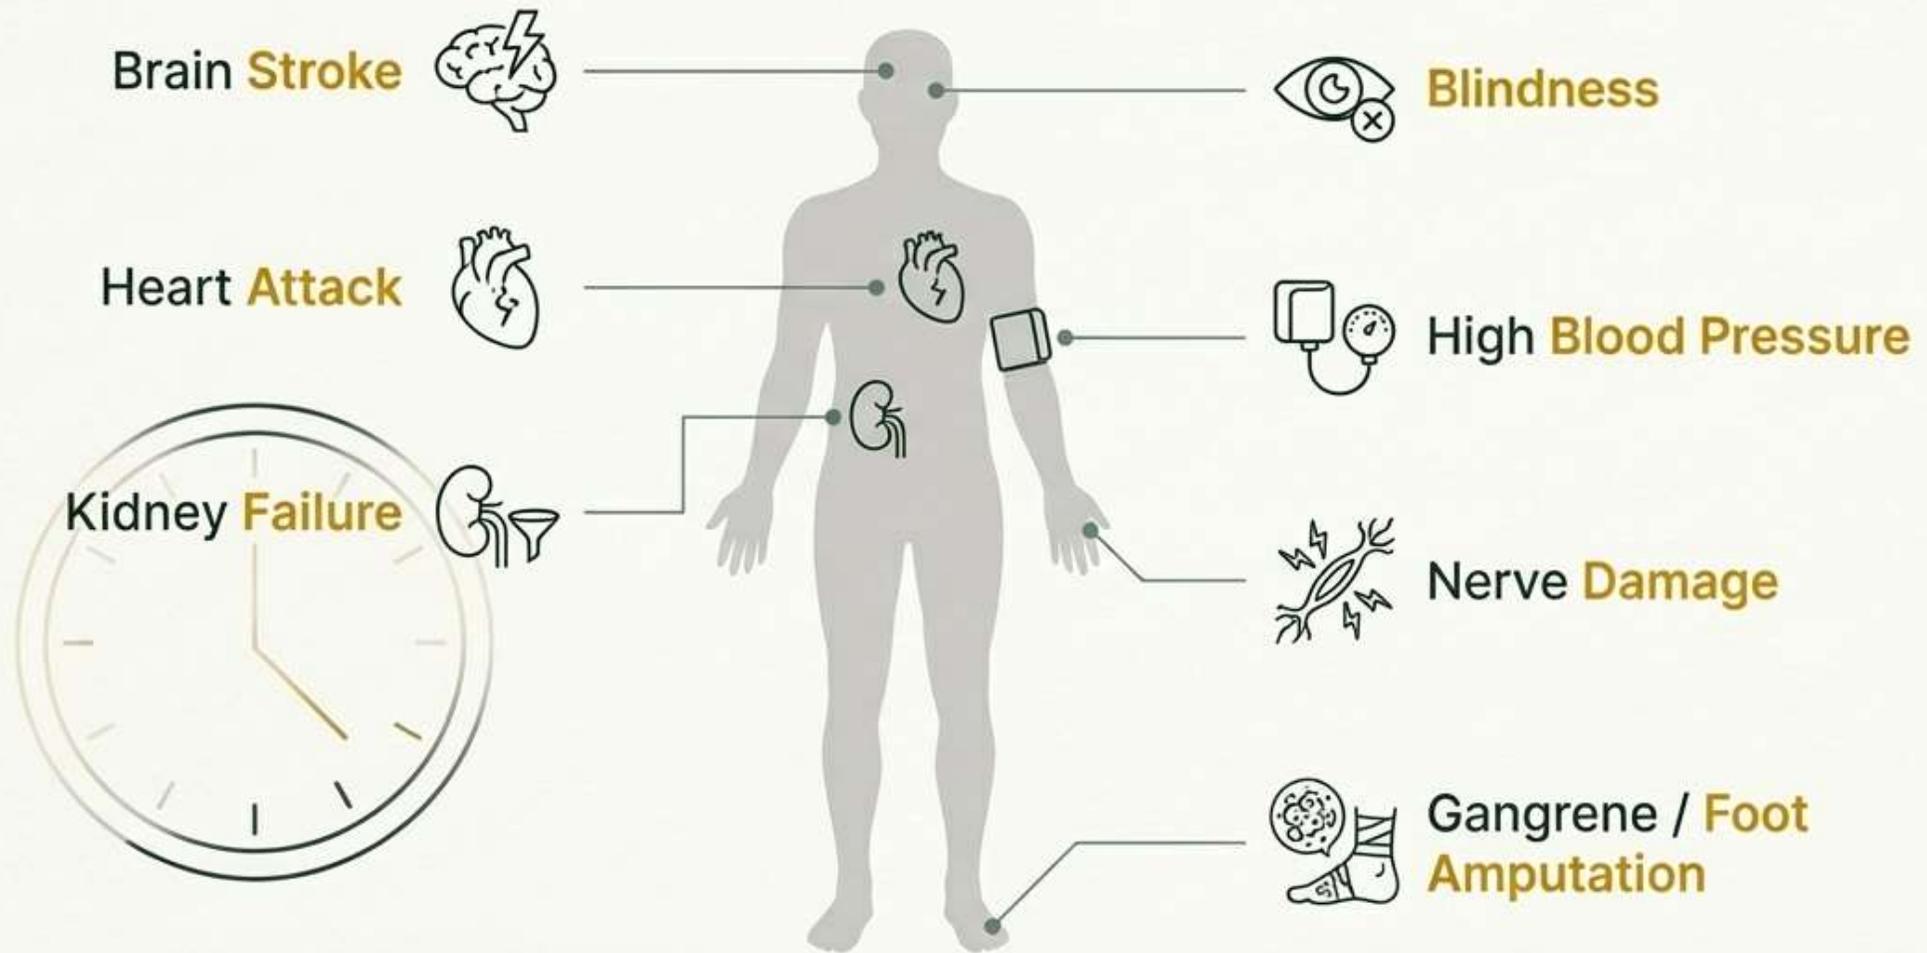

Diabetes is a chronic disease that can lead to serious health complications and death.

In 2021, diabetes was responsible for 6.7 million deaths globally.

**That is one person
dying every **five**
seconds.**

The High Cost of Inaction: The Systemic Impact of Untreated Diabetes

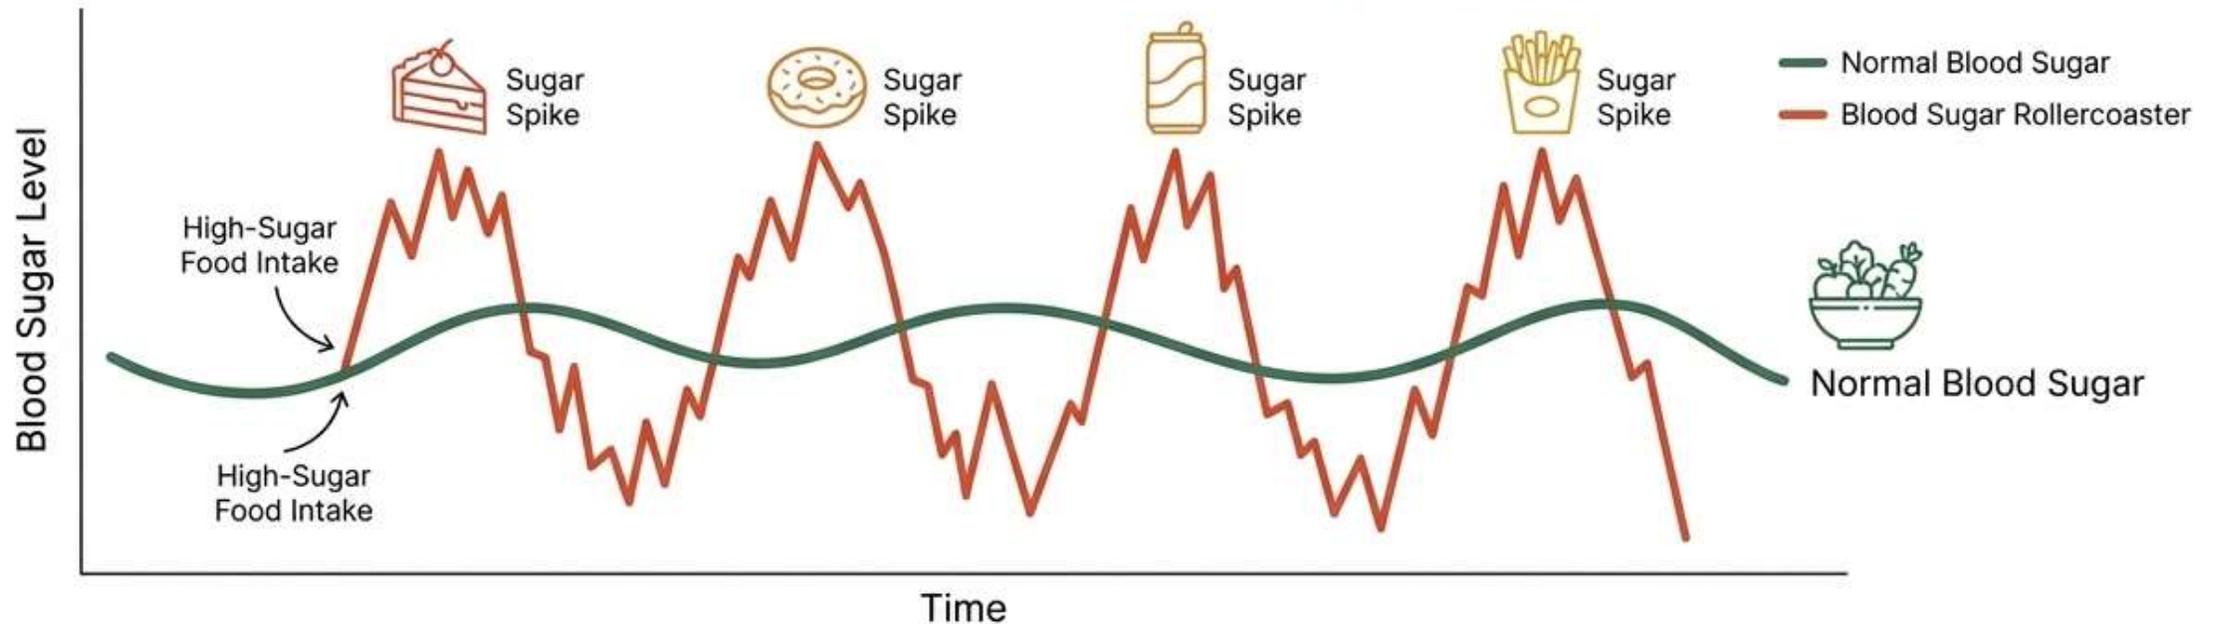

Beyond the Diagnosis: The Daily 'Roller Coaster' of Sugar Management

Ideal Glucose Levels

- **Fasting:** 70 to 99 mg/dL
- **Postprandial (2 hours after eating):** Less than 140 mg/dL
- **Random:** Less than 200 mg/dL

The Roller Coaster Effect (Fluctuating Sugar Levels)

A New Paradigm in Wellness: Control Your Sugar, Without Eating Medicines.

Introducing **Sug-Rodhi**: A Topical Ayurvedic
Spray for Sugar Management.

The Industry Leader in
Non-Eating-Non-Drinking Solutions.

How it Works

1. Spray

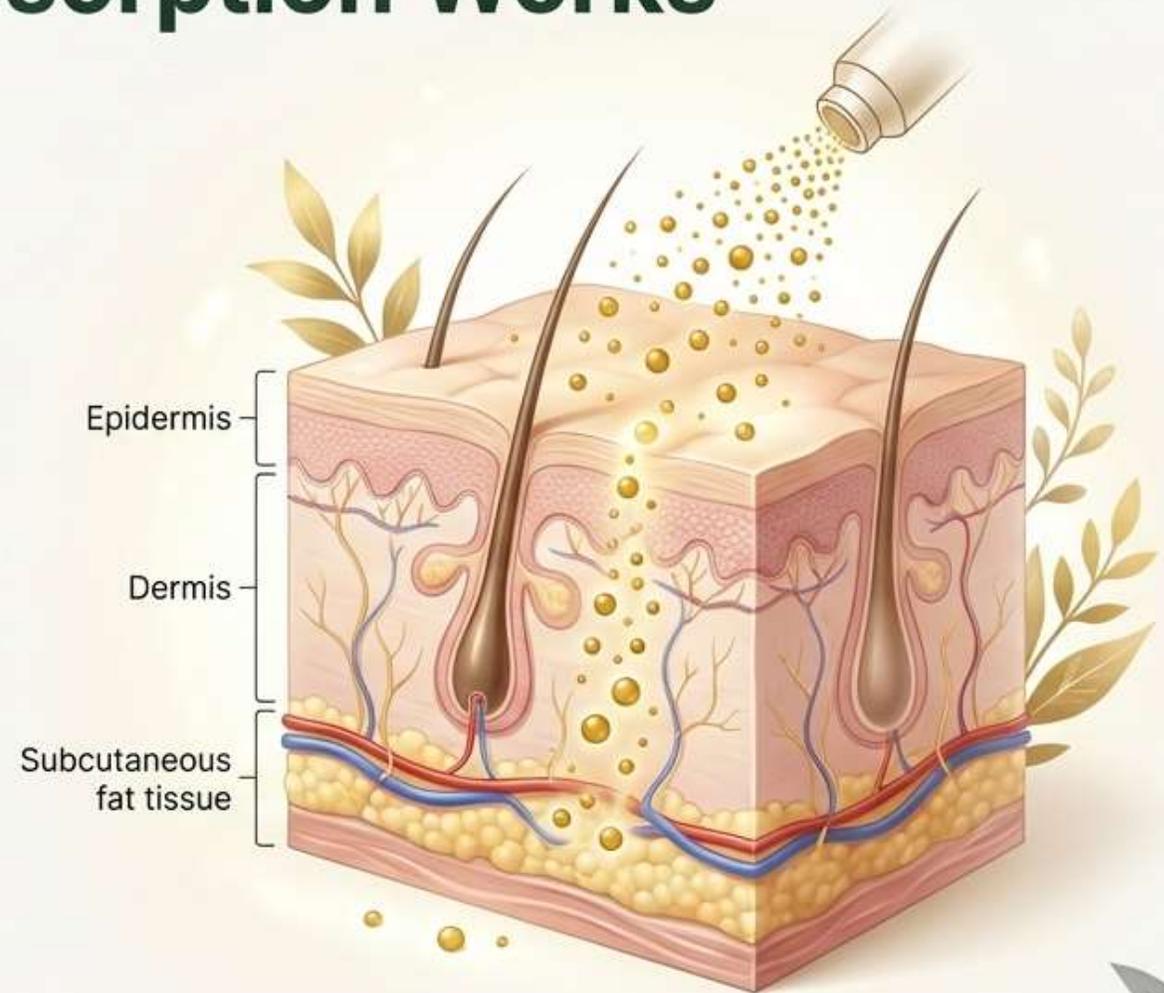

2. Rub

The Science of Simplicity: How Topical Absorption Works

- ✔ Works on External Application
- ✔ No need to eat or drink, just spray.
- ✔ No need to taste bitter medicines.
- ✔ Easy and convenient
- ✔ Faster Absorption
- ✔ Formulation Approved by
Directorate of Ayush, Delhi

The Sug-Rodhi Advantage: Pure, Safe, and Certified

- Natural Ayurvedic Product
- Purely Herbal
- Absolutely Safe to Use
- No Side effects
- Spray form
- Suitable for all Age groups
- Ayush Certification

Proper diet, healthy food habits, exercise, meditation, good lifestyle should be followed.

Harnessing Nature's Wisdom: A Multi-Action Ayurvedic Formulation

Sug-Rodhi is a proprietary Ayurvedic medicine composed of an aqueous distillate from 18 powerful herbs. Each ingredient is carefully selected for its scientifically-recognised properties in sugar management. This synergistic blend works on multiple pathways to help restore balance.

A Synergistic Approach: Improving Insulin Sensitivity & Secretion

Helps Improve Insulin Sensitivity

Karela (*Momordica charantia*):
Contains an insulin-like compound called **polypeptide-p**.

Badam (*Prunus amygdalus*):
May aid in reducing blood sugar levels.

Neem (*Azadirachta indica*):
May enhance insulin receptor sensitivity.

Helps Improve Insulin Secretion

Kutki (*Picrorhiza Kurroa*):
Could stimulate insulin secretion from the pancreas.

Gudmar (*Gymnema sylvestris*):
The 'destroyer of sugar,' it enhances insulin production.

Giloy (*Tinospora cordifolia*):
Potentially improves glucose utilisation by cells.

A Synergistic Approach: Regulating Glucose Metabolism & Absorption

Helps Increase Glucose Metabolism

Amla (*Emblica officinalis*):
Rich in antioxidants, could help improve the body's insulin response.

Chirayata (*Swertia chirata*):
Could improve metabolism and has potential anti-diabetic properties.

Vijaysar (*Pterocarpus marsupium*):
May protect pancreatic cells and promote insulin secretion.

Helps Reduce Absorption of Glucose

Jamun (*Syzygium cumini*):
May reduce after-meal blood sugar by influencing carbohydrate metabolism.

Methi (*Trigonella foenum-graecum*):
Seeds contain fiber that may slow digestion and absorption of carbohydrates.

A Synergistic Approach: Comprehensive Blood Glucose Support

Helps Reduce Blood Glucose Level

Indrayan (*Citrullus colocynthis*):

May help regulate blood sugar by boosting insulin production.

Neemboli (*Azadirachta indica*):

Helps enhance insulin receptor sensitivity.

Bael (*Aegle marmelos*):

Could influence insulin metabolism.

Daruhaldi (*Berberis aristata*):

May help regulate glucose levels.

Helps Improve Glucose Tolerance & Provides Support

Ber (*Ziziphus jujuba*):

May help moderate glucose levels in the blood.

Kalonji (*Nigella sativa*):

Could improve glucose tolerance.

Punarnava (*Boerhaavia diffusa*):

Possesses anti-diabetic properties and supports kidney health through its diuretic effect.

The Complete Formulation: Transparency in Every Drop

INGREDIENTS	LATIN NAME	QUANTITY	PARTS USED
Indrayan	<i>Citrullus colocynthis</i>	400 mg	Fruit
Gudmar	<i>Gymnema sylvestre</i>	300 mg	Leaf
Daruhaldi	<i>Berberis aristata</i>	100 mg	Root Bark
Chirayita	<i>Swertia chirata</i>	150 mg	Panchang
Neemboli	<i>Azadirachta indica</i>	100 mg	Seed
Jamun	<i>Syzygium Cumini</i>	100 mg	Seed
Kalonji	<i>Nigella sativa</i>	60 mg	Fruit
Badam	<i>Prunus amygdalus</i>	30 mg	Seed
Punarnava	<i>Boerhaavia diffusa</i>	400 mg	Root
Amla	<i>Emblica officinalis</i>	100 mg	Fruit Pericarp
Neem	<i>Azardica indica</i>	160 mg	Panchang
Karela	<i>Momordica charantia</i>	100 mg	Fruit
Giloy	<i>Tinospora cordifolia</i>	25 mg	Stem
Bael	<i>Aegle marmelos</i>	25 mg	Stem
Ber	<i>Ziziphus jujuba</i>	40 mg	Fruit
Kutki	<i>Picrorhiza kurroa</i>	100 mg	Root
Vijayasar	<i>Pterocarpus marsupium</i>	500 mg	Stem Bark
Methi	<i>Trigonella foenum-graecum</i>	100 mg	Seed

PRESERVATIVES:

Potassium Sorbate: 0.25%

Sodium Benzoate: 0.30%

OTHER EXCIPIENTS:

DM Water

Scientifically Designed Dosage for Maximised Sugar Management

Please check your PPBS (Reading after 2 hours of taking food).

SUGAR LEVEL	Spray / Day	Dosage
140-199 mg/dl	1 Spray	1-0-0
200-250 mg/dl	2 Spray	1-0-1
250+	3 Spray	1-1-1

Sug-Rodhi should be taken 30 minutes before meals to be effective.

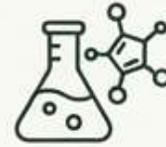

As your sugar level begins to decrease, you can cut down on your medication after consulting your health care professional about reducing your allopathic medication.
